

# VBC Release Highlights

January 2022

Practice Insights is pleased to announce updates in the application to support the Oncology Care Model (OCM) and Merit-based Incentive Payment System (MIPS).

## OCM Performance Measure Dashboard

An update was made to add the 1H 2022 time period to the drop-down.

In addition, the 1H-2022 Technical Specification Values have been updated, including minor changes to the ICD-10 codes for the bipolar and depression diagnoses that affect the denominator exclusion.

There are no measure specification updates for 1H 2022 to OCM 4 or OCM 5.

At this time, OCM 4a, OCM 4b, and OCM 5 reflect the 1H 2022 quality measure requirements and no additional updates are anticipated.

## MIPS Quality Measures Dashboard

As practices prepare for 2022, please note, the QCDR custom measures below will be retired and are not available for 2022 MIPS data submission. They will be removed from the dashboard after the close of the 2021 data submission season.

- PIMSH 3: OCM-9 Combination Chemotherapy Stage I-III Hormone Receptor Negative Breast Cancer
- PIMSH 11: Utilization of PET, PET/CT, or CT Scans for Breast Cancer Stage 0, I or II at Any Time During the Course of Evaluation and Treatment (Inverse Measure)
