

VBC Release Highlights

June 2, 2022

Practice Insights is pleased to announce updates in the application to support the Merit-Based Incentive Payment System (MIPS).

New PIMSH 12: COVID-19 Vaccination Quality Measure

On Monday, June 6, 2022, users will see the new 2022 CMS-approved Practice Insights QCDR custom MIPS Quality Measure, PIMSH12: COVID-19 Vaccinations.

In partnership with US Oncology Network clinicians and the Ontada Clinical Review Board, our team developed this new QCDR measure to assist practices in tracking their patients' COVID-19 vaccination status. Specifically, this measure assesses the completeness of a full COVID-19 vaccination series.

Alongside the clinical benefits of tracking vaccination status, new quality measures in their first year of reporting have a 7-point benchmark floor. Groups and clinicians that meet the 70% data completeness and the case minimum requirements would be eligible to receive at least 7 points for reporting this measure for the performance year 2022.

Additionally, reporting the new PIMSH 12 measure for 2022 will help to establish future measure benchmarks and promote the value of our custom QCDR measures to CMS.

It is important to note that this measure's focus is to assess the completeness of a full COVID-19 vaccination series. Currently, PIMSH 12 does not assess the status of boosters. Future development may incorporate booster status to provide additional insight into patient care.

Measure specifications, job aids, and additional information are available on the COVID-19 Vaccination Measure help page [COVID-19 Vaccination Measure Help page](#).

Status of Dashboard Updates for 2022

CMS releases updates to the quality measure specifications annually for the MIPS program and bi-annually for the OCM program. These measure specifications have been reviewed and Practice Insights is currently working on

the required technical updates to align with the revised requirements. McKesson will continue to notify practices once measures have been updated based on the current 2022 requirements. The measures listed below either have no 2022 update required or have been updated.

NOTE: Tables continue on the next page.

Measure	Description
MIPS Quality Measures Dashboard	
#047	Advance Care Plan
#110	Preventive Care and Screening: Influenza Immunization
#128	Body Mass Index (BMI) Screening and Follow-Up Plan
#130	Current Medications Documentation
#134	Depression Screening
#143	Pain Intensity Quantified
#144	Pain Care Plan
#226	Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention
#374	Closing the Referral Loop
#451	RAS (KRAS and NRAS) Gene Mutation Testing Performed for Patients with Metastatic Colorectal Cancer who Receive Anti-epidermal Growth Factor Receptor (EGFR) Monoclonal Antibody Therapy
#453	Proportion Receiving Chemotherapy in the Last 14 Days of Life (Inverse Measure)
#457	Patients Admitted to Hospice for < 3 Days
PIMSH#1	Advance Care Planning in Metastatic Cancer
PIMSH#2	Utilization of GCSF in Metastatic Colon/Rectal Cancer (Inverse Measure)
PIMSH#4	Patient-Reported Pain Improvement

Measure	Description
PIMSH#9	Supportive Care Drug Utilization in the Last 14 Days of Life (Inverse Measure)
PIMSH#10	Hepatitis B Serology Testing for Prophylactic Treatment Prior to Receiving Anti CD20 Targeting Drugs
PIMSH#12	COVID-19 Vaccinations
OCM Performance Measures Dashboard 1H 2022	
OCM 4A	Pain Intensity Quantified
OCM 4B	Plan of Care for Pain
OCM5	Depression Screening
