Clinical Profile Documentation

Additions

The Clinical Profile 'Problems' sub-tab now includes Line of Therapy to accommodate documentation points for Dermatofibrosarcoma protuberans (disorder).

Problems

The following items are available for documentation in Problems and appear on the Charge Capture Report (CCR). Additional ICD-10 codes* may display to present the surrounding nodes.

Billing & HCPCS Codes

Bortezomib Billing Guidance

The billing for this medication can be a bit tricky due to two different HCPCS billing codes:

- J9041 for Velcade or its equivalent generic (Bortezomib)
- J9044 for Bortezomib, Not Otherwise Specified

The best course of action to ensure the charge capture renders the correct code is to document the NDC that corresponds with the medication administered.

If the NDC is not documented, we suggest reviewing the charge capture to confirm the billing code. If you find the billing code is incorrect, billing considerations can be used.
