Clinical Profile Documentation

Problems

Additions

New items are available for documentation in **Problems** and appear in the **Charge Capture Report**. Additional ICD-10 codes* may be displayed to present the surrounding nodes. **Appendix A** contains a complete summary of changes.

The **Problems > Add Details** area is updated with applicable documentation points for the following diagnoses:

RET gene mutation is now available for **Colon cancer, Hepatocellular carcinoma (HCC), and Rectal cancer** with the following documentation points:

- RET fusion positive
- RET fusion negative
- Ordered: Result pending
- Not performed
- Unknown

Conventional risk model is now available for **Polycythemia vera** with the following documentation points:

- Low-risk (age < 60 years and, no history of thrombosis)
- High-risk (age >= 60 years and/or prior history of thrombosis)

MIPSS-PV is now available for **Polycythemia vera** with the following documentation points:

- Low (0-1 point)
- Intermediate (2-3 points)
- High (4 points or greater)

Updates

FGFR3 gene for **Bladder cancer** now contains a new documentation point:

- Gene fusion

Polycythemia Vera has been assigned a **pathway (PW)** designation to ensure documentation remains synonymous with clinical decision support and ICD-10 mapping. The following problems now have **PW** to the left of the problem in the search results:

- Familial polycythemia vera (disorder)

- Polycythemia vera
- Primary familial polycythemia due to erythropoietin receptor mutation

| Pegfilgrastim Subcutaneous (via wearable injector) | <p>New Instructions: May be applied by a healthcare professional on the same day as chemotherapy or the last day of chemotherapy in a multi-day regimen using only the co-packaged pegfilgrastim. Within 3 minutes of filling the on-body reservoir, the device must be applied to patient's skin (abdomen or back of arm). Usually applied to the abdomen, the back of arm should only be used if there is a caregiver available to monitor the injector. Pegfilgrastim will begin infusing approximately 27 hours later and deliver pegfilgrastim over 45 minutes. NOTE: This is Neulasta On-Body Injector.</p> |

Regimen Library

Biosimilar and Reference Regimens

To improve ease of ordering, the Collaborative Care Committee (CCC) voted to merge separate biosimilar and reference regimens into single regimen templates. The initiative is complete with this content release.

This release contains the consolidation of all trastuzumab regimen templates and reflects the change in USON preferred product from **Kanjinti (Trastuzumab-anns)** to **Trazimera (Trastuzumab-qyyp)**.

For a list of all merged trastuzumab regimens please refer to **APPENDIX B**.

Additions

Updates

Regimens for the following diagnoses have been updated based on the Collaborative Care Committee voting. Changes include but are not limited to reference update, drug infusion instruction updates, renaming of regimens, premedication template updates and number of cycles.

- Breast Cancer
- Colon Cancer
- Esophageal Cancer (Parent)
- Gastric Cancer
- Multiple Myeloma (MM)
- Pancreatic Cancer
- Rectal Cancer
- Uterine Cancer (Parent)
