

# Precision Medicine Electronic Ordering in iKnowMed

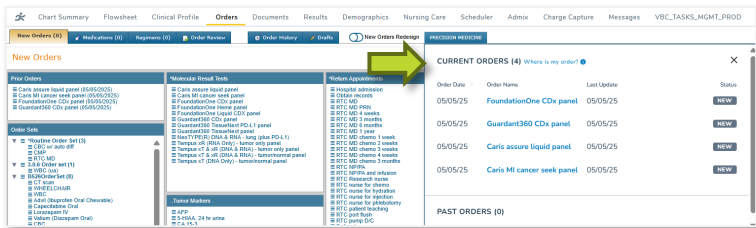

To place an electronic order, you must sign and save genomic order in iKnowMed on the **Orders** tab > **New Orders**.

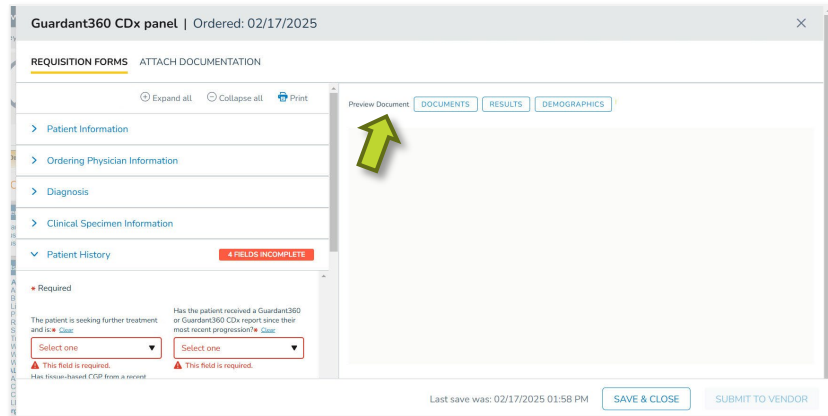

After ordering a genomics test, click the Precision Medicine button near the top of the Orders page.

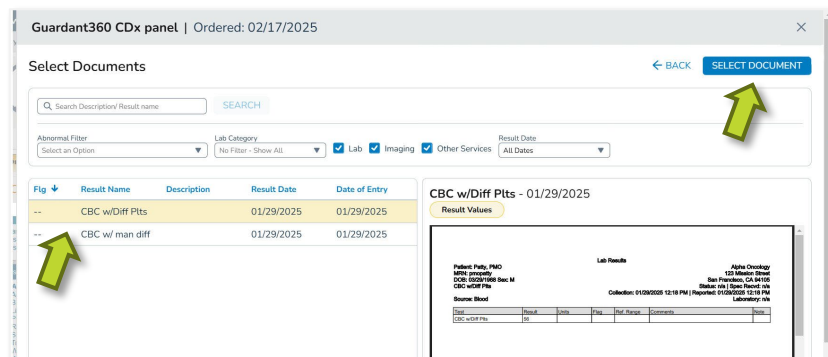

To complete a requisition form, click on the new or in-progress order you want to submit.

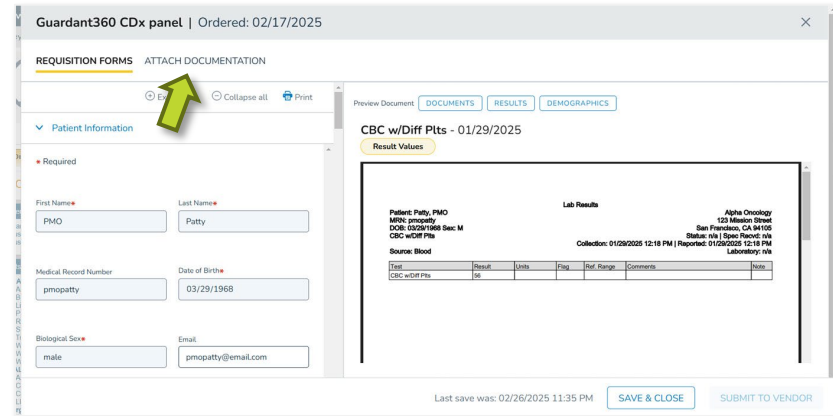

When the requisition form displays, complete all required fields. Documents, results, or demographics data attached to the patient chart can be previewed to help complete the requisition. Select the type you want to open.

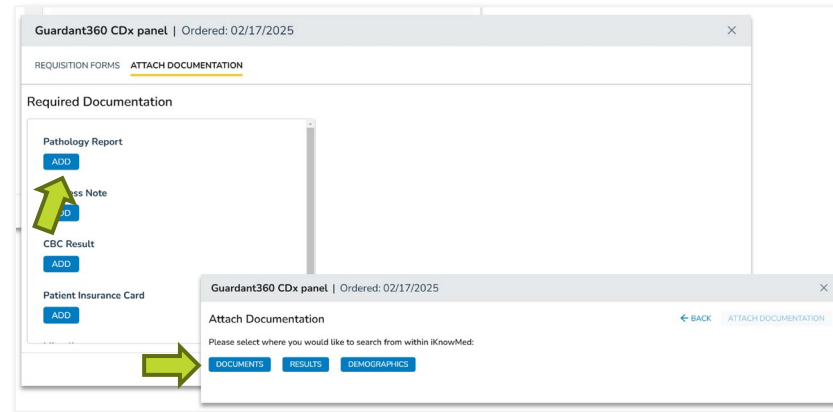

Highlight the desired item from the left-side list before clicking the **Select Document** button to preview the document.

Use the previewed document to complete the requisition form. To attach the document, select **Attach Documentation**.

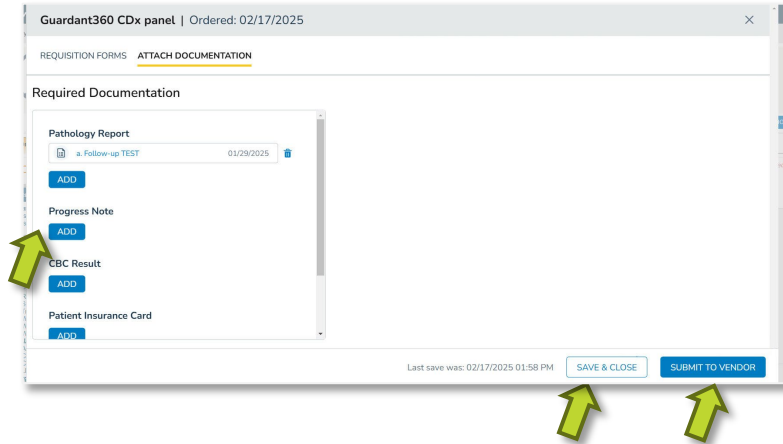

Click the **Add** button beneath the document type you need to attach. Choose to add **Documents, Results, or Demographics**.

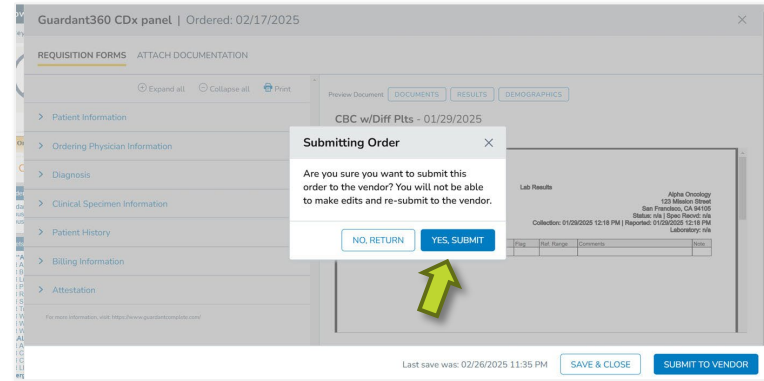

# Precision Medicine Electronic Ordering in iKnowMed

To add another document to the same category, click the Add button again. After adding all required information, click **Save & Close** to save the order as a draft or click **Submit To Vendor** to send the completed order.

Next, a confirmation window displays. Click the **Yes, Submit** button to submit your order to the vendor.

A success message displays at the top of the screen to confirm the form was received by the vendor.
